ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: APPARATUS AND METHOD FOR TURNING OF PAGES IN A DIGITISED VIRTUAL DOCUMENT

(57) Abstract: The present invention relates to an apparatus and a method for displaying a digitised document to an audience. A memory (20) is provided for storing of at least one dig-itised document in a computer readable file format, wherein a processing means (10) is adapted to retrieve documents and process it into a near-identical document rep-lica. Moreover, a display (30) visualises document and animation of the document, such as the turning of a layer, being controlled by the audience. The function of the apparatus is characterised by the audience indicating when real-time animation of a layer (51, 52) is about to begin or revert to its initial state, and the indication is gov-erned by crossing a dividing line with an indicating element substantially in lateral direction.
